

INSTITUTIONAL ACTION PLAN OUTCOME REPORT UPDATE

Dr. Linda Probyn
December 16, 2022

AFI 2.2.2: Resources

Michael Garron Hospital and Mount Sinai Hospital have new and improved Wi-Fi access for learners

- Communication will continue to inform learners of the new Wi-Fi
- To track progress, surveys were completed in November 2022 & will be sent again in May 2023

Trillium Health Centre

- Tracking to ensure sufficient number of call rooms
- Surveyed residents in August 2022 to identify any barriers to call room access and are implementing changes based on feedback

AFI 4.1.4: Onboarding

As of **January 1st 2023**, our hospital partners at HUEC have committed to **reducing their site-based e-module** requirements to:

- EMR training
- PPE Donning and Doffing
- Core CODE training

Requests for any additional site specific on-boarding requirements are being reviewed by HUEC On-boarding Working Group

AFI 4.1.4: Onboarding

- Communication will be sent to residents
- Residents will be asked to notify PGME when there are additional e-Module requirements
- Some on-boarding requirements previously done at the site level that are actually program specific may need to be moved to officially program-based requirements completed during protected academic time

Note: The expectation is that all on-boarding requirements must be completed during working hours (i.e. NOT post-call, evenings or weekends)

AFI 6.1.1: Teacher Evaluations

LACT Forms in Elentra

- Announcement will be sent to learners in the new year regarding the opportunity to use on-demand LACT forms in Elentra
- This is the same assessment form (LACT) that is currently being used in POWER
- Aim to increase numbers of assessments for faculty through on-demand feature in Elentra

Questions/Discussion

Thank You.
