

# BPEA update

....refined overall Entrustment Scale

**OVERALL:** Indicate your assessment of this resident's performance on this specific encounter. This assessment does not confer overall entrustability; it will inform future Competence Committee decisions that are made in consideration of all available data.

Overall: Indicate **your assessment**<sup>1</sup> of this resident's performance on this **specific encounter**<sup>2</sup>. This assessment **does not confer overall enstrustability**<sup>3</sup>; it will inform future **Competence Committee** decisions that are made in consideration of **all available data**<sup>4</sup>.

Your assessment is a **binary (yes/no) decision** about your view of the resident's performance for a specific EPA and time

'Yes' to entrustment = Assessor's view that the resident performed the observed EPA in a safe manner

'No' to entrustment = Assessor's view that the resident did not yet perform the observed EPA without need for assistance and/or intervention

After deciding 'yes/no', select the descriptor that best matches your observation

# Technical notes

1. Implications of change
2. Timing of implementation
3. Resources
