

Voice of the Resident Entrant

Voice of the Resident Entrant survey

- ❖ To streamline the Voice of the Resident survey, we introduce the Voice of the Resident Entrant survey. In future iterations, it will be conducted annually before the start of each academic year.
- ❖ The goal of this new survey is to gather the socio-demographic details of incoming residents, creating a panel dataset for resident information.
- ❖ By collecting socio-demographic information upfront with the Voice of the Resident Entrant survey, we can significantly reduce repetition and make the overall experience more efficient for Voice of the Resident survey respondents.
- ❖ Similar data has been collected for incoming MD students, with the Voice of the MD Student Entrant survey being conducted for 10 years.
- ❖ This survey was developed in collaboration with the OID office and under their guidelines on EDI data governance.
- ❖ We plan to deploy the first iteration of the Voice of the Resident Entrant survey in October 2025. This initial version will be refined and adjusted based on feedback and results from the survey.

Panel dataset

- ❖ All respondents will be asked to give consent to link their responses to other Voices surveys. Currently, 67% of respondents to the 2025 Voice of the Residents survey gave consent to link their data.

To maximize our understanding of the residency experience, it would be beneficial to be able to link your responses from this Voice of the Resident survey to your responses in past/ future Voice of the... surveys that you participate(d) in. Your identity and responses will be kept strictly confidential at all times. You may withdraw your consent at any time.

Do you provide your consent for your responses to this survey to be linked with your responses to other Voice of the... surveys?

- ☐ Yes, I give my consent
- ☐ No, I do not give my consent
